# Greeting

This year, the 14th annual meeting of JAMD will be held for 3 days from April 14th to 16th at Tokyo Hitotsubashi hall. The main theme of this annual meeting is “A leading bird of the flock” containing the message of Microscopic dentistry would lead a whole dentistry in the better way. During this annual meeting, we encourage you to verify and concern multiple innovative changes rise from magnification dentistry in conventional dental techniques. The annual meeting will also host work-shops as a new challenge from JAMD organization. And these work-shops are aiming for those new entries and beginners of micro-dentistry to learn know-hows of working under a magnified view. JAMD is looking forward to have those new entries and beginners to use this opportunity. At the same time, to attract more dentists from abroad, there will be an English translation available for those lectures held at its main hall. We believe that this would enable us to exchange and communicate microscopic dentistry with those from abroad, especially from those Asian regions. Now a days, “Microscopic Dentistry is gaining its share in the market of Japan and we wish to expand this to those Asian regions and will eventually develop JAMD organization. At last but not least, we promise you that this annual meeting will be fruitful and beneficial to all of attendances.

**Congress President**  
**Masana Suzuki, DDS, PhD**
